SOFTWARE ARCHITECTURE AND DESIGN

Course name: Software Architecture and Design

Course code: 2101452

Department: Software Engineering

REPORT

A. SUBJECT

- Software Architecture and Design
- Student ID 1:
- Full Name:
- Student ID 2:
- Full Name:

No	Evaluation criteria	Maximum score	Student ID 1	Student ID 2	Note
1	Link gitlab	0.5			- No link gets 0 points - Only 1 person contributes 0.25 code for the contributing person
2	Google Drive document	0.5			- Having an image link gets 0.25 - - Contains slides of 0.25
3	Project Description (image about system)	0.75			***Check the reasonableness of:*** - API gateway is 0.25 - Redis set service gets 0.25 - Service sets JWT to 0.25
4	Json Web Token (JWT)	0.5			- Return Token when Login is correct 0.25 - When applied to the current problem, it is 0.25
5	Redis (CRUD 1 object)	0.5			- Create 0.125 - Read 0.125 - Update 0.125 - Delete 0.125

No	Evaluation criteria	Maximum score	Student 1	Student 2	Note
6	Retry 3-5s (API call 1 service)	0.5			- Calls can be made after restarting the service
7	Rate Limiter client (API call 1 service)	0.5			- After 5 calls in 1 minute, a notification is displayed
8	Docker All Services	0.5			- Minimum 5 images
9	Docker Compose	0.5			- Reasonable Docker Compose file structure is 0.5 - Run at least 3 services at 0.5
10	Jenkin	1			- What is the use of understanding Jenkin? get 0.25 - Installed Jenkin on the device for 0.25 - Run Jenkin for 0.5
11	Gitlab CI/CD	1			- Understand what CI CD is? - Run CI/CD with Gitlab
12	Agile-Scrum	0.75			- Check road map 0.125 - Check spring 0.125 - Check answer Product Owner, Sprint Planning, Sprint Review, Sprint Retrospective 0.5
13	Deploy	0.5			- Run on internet (Test API online)
14	Rate Limiter Server (API call 1 service)	0.5			- Able to do Limiter request server
15	Terraform or Ansible Concept and Example Basic	0.5			- Explaining Terraform or Ansible is 0.25 - Run an example of Terraform or Ansible for 0.25
16	AI Apply	0.5			

17	UI	0.5			
	SUM	**10**
